Primer

Primers

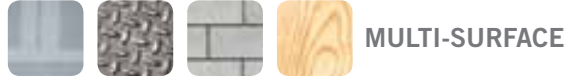

Why prime?

Primer prepares and adheres to unpainted surfaces so that the topcoat will go on smoothly, dry evenly and give you the best look, feel and finish while saving time, paint and ultimately money.

Why the right PRIMER?

With the different kinds of surfaces you will encounter on projects, selecting the right primer is as important as the right paint. Dunn-Edwards offers a broad range of specially formulated primers. Every one of our primers delivers the right performance on the surfaces they were designed for to get each and every painting project off to a great start.

Applicators

DUNN-EDWARDS® EX-PRO™ Brushes

Push-Chisel Construction

Ensures the tip of your brush maintains its natural flagging and helps keep it from getting worn and frayed. Paint dries to a smooth and even finish that looks great, especially in areas that need cutting in.

Specially Formulated

Specially formulated to work with Dunn-Edwards' coatings. Its custom design allows you to apply 60% more paint per load than competitive brushes.

100% Full Stock

More filaments per square inch than competitive brands, which improve stiffness and allow for more pick up and release of paint—so you spend less time dipping and more time painting.

Dual-Component Epoxy Setting and Annular Nails

Secure bristles to the ferrule and insert. Provide a strong attachment of the ferrule to the handle so your brush lasts longer.

Stainless-Steel Exact-Taper Ferrule

Stainless steel improves the strength and durability of your brush and prevents rusting. Exact taper design enhances your cutting-in abilities.

Plain Sanded Hardwood Handle

Shaped, smoothed and sanded for ultimate comfort. Also resists chipping and splintering.

DUNN-EDWARDS® Sheepskin Wool Roller Covers

Premium-Quality Merino Sheepskin
Our 100% handmade sheepskin covers are made from only the most premium-grade skins and specially tanned to ensure the highest-quality product available.

Clean End Product
Each cover is carefully trimmed and vacuumed to ensure a smooth finish every time.

Strong, Resistant Core
Made of heavy-duty, six-ply phenolic material and end-sealed so it's impermeable to water and solvent-resistant for a longer-lasting roller cover.

More Fibers Per Square Inch
Sheepskin covers can have up to eight times as many fibers per square inch as the best quality synthetic covers and give you two to four times more coverage, so you can spend more time painting and less time dipping.

Dunn-Edwards® Sheepskin Roller Covers Give You 168% More Coverage.

Sheepskin Coverage – 75 sq. ft.

Synthetic Coverage – 28 sq. ft.

A factor to consider when choosing a roller cover is the surface you'll be painting. The general rule when choosing a roller nap is the smoother the surface, the shorter the nap; the rougher the surface, the longer the nap. Kitchens and bathrooms generally have walls with a smooth finish would use a 1/4" to 3/16" nap. Bedrooms or hallways that may have a light textured surface and would use a 3/8" to 1/2" nap. Check the chart for proper nap size recommendations.

FEATURES	BENEFITS
1/4" to 3/16"	Smooth Surfaces – Metal, Drywall, Smooth Wood, Smooth Plaster
3/8" to 1/2"	Semi-Smooth Surfaces – Walls, Ceilings, Lightly Textured Drywall
3/4" to 1"	Semi-Rough to Rough Surfaces – Stucco, Medium Texture, Concrete Block
1 1/4" to 1 1/2"	Very Rough Surfaces – Stucco, Brick, Rough Shingles, Corrugated Metal

Lacquers

VALSPAR Lacquer

Lacquer makes wood objects look like they have a thick, high shine shell on top of the surface. When lacquer is used, the eye sees two layers—the top layer of the wood object and the layer of lacquer on top of it. There are three primary types of lacquers: nitrocellulose (quick drying and inexpensive—can turn yellow over time; good on wood), acrylic (avoids the yellowing problem, applies crystal clear and stays that way for a long time) and catalyzed (a hybrid that cures chemically).

Not all tapes are created equal. No single tape will perform well in all applications. The right tape can mean the difference between a job well done and having to do a job over.

At Dunn-Edwards we carry a full line of tapes for use on all paint projects. To learn more about the various tapes we carry, please speak with your local sales representative for more details.

B-I-N, BONDZ, Bulls Eye, Bulls Eye 1-2-3, Cover Stain, Gardz, Peel Stop, and the ZINSSER Bulls Eye design are registered trademarks of Rust-Oleum Corporation.

- NOTES:**
 * Interior Use Only (exception: B-I-N may be used for exterior SPOT-priming.)
 ** Where Compliant
- (1) Allow new masonry, plaster & stucco to cure before coating.
 - (2) Do not use Peel Stop over alkyd/ oil-base paint over galvanized.
 - (3) Do not use ODORLESS under any type of wallcovering.
 - (4) For best results, allow Bulls Eye 1-2-3 and Bulls Eye 1-2-3 plus to dry 24 hours before applying topcoat.
 - (5) Sap stains may require a second coat of Cover-Stain or Bulls Eye Oil-Base.
 - (6) Use appropriate cleaner to remove mildew.
 - (7) Only B-I-N can be used on floors.
 - (8) Use BONDZ Maximum Adhesion Primer with all paints, including epoxies. Bondz is recommended for difficult-to-paint surfaces such as melamine, metal doors and frames, glazed brick, and exterior fiberglass surfaces (i.e. awnings and garage doors). READ INSTRUCTIONS ON PRODUCT CONTAINER FOR FURTHER INFORMATION.

Primers/Sealers

DUNN-EDWARDS® Block-It® Aerosol Primer

Superior hiding, stain-blocking All Purpose primer seals in tough stains

It is ideal for:

- :: Sealing and blocking stains caused by water, nicotine, smoke, tannin, pencil, ink, grease, and felt marker
- :: Sealing smoke and pet odor
- :: Use on interior/exterior wood, concrete, drywall and non-galvanized metal
- :: Sticks to hard to paint surfaces such as railings, shutters, glossy paint, glass, ceramic tile, and outdoor furniture
- :: It sands easily and is perfect for sealing spackle drywall repairs, and hiding dark colors
- :: Fast Dry — Recoat in 30 minutes

Primers/Sealers

Primers are problem solvers. We're the resource for choosing the correct primer!

There is primer for every surface and need for application—hiding dark colors, blocking stains, sealing surface, enhancing adhesion, blocking odors, or for new interior or exterior wood, etc.

Remember, primers make any painted surface more durable and washable and help your paint job look better and last longer, preventing frequent, costly repainting.

ZINSSER® OKON® Waterproofers IN STOCK

Why Water-Repellents are Important

Concrete and masonry surfaces are porous and will absorb water to varying degrees. As water enters the surface it sets up conditions that can result in a variety of problems including:

- :: Deterioration of the surface caused by freeze-thaw and efflorescence
- :: Loss of structural strength caused by rusting of rebar, nails and fasteners
- :: Mold & mildew growth in interior wall cavities
- :: Damage to interior drywall, carpeting and flooring

The OKON line includes two types of water-repellent sealers: Deep penetrating silane-siloxanes, which form a chemical bond with the concrete and mortar Acrylic micro emulsions that form a penetrating barrier
