Technical Data Sheet

CastFX Liquid Colorants

DESCRIPTION

CastFX Colorants are designed to work specifically with RiverCast and MirrorCast epoxies. Colors include blue, red, yellow, green, brown, black, and white. Add a little for a transparent effect or add up to 4 ounces per mixed gallon for complete opacity. CastFX Colorants can be intermixed with one another to create your own unique color blend.

CastFX Liquid Colorants and CastFX Dry Metallic Pigments can be used together to create stunning, one-of-a-kind effects.

Individual Colorant Properties	**Blue**	**Red**	**Yellow**	**Green**	**Brown**	**Black**	**White**
