Technical Data Sheet

CastFX Dry Metallic Color Pigments

DESCRIPTION

CastFX Dry Metallic Color Pigments are powders that can be added directly to RiverCast, MirrorCast and MirrorCoat. These pigments add a stunning pearlescent effect to our epoxy resins. CastFX Dry Metallic Color Pigments can be intermixed with one another to create your own unique color blend.

CastFX dry color pigments and CastFX Liquid Colorants can be used together to create stunning, one of a kind effects.

For health and safety information concerning this product, please refer to the SDS sheets for CastFX Dry Metallic Pigments at systemthree.com.
