

WOOSTER[®]

pro/doo-z[®] FTP[™]

With HydroFlow[™] Technology for Controlled Release

No shed, non-matting, and better paint flow...Pro/Doo-Z FTP has everything you want in a roller for flawless results, and more! New HydroFlow technology enables the cover to release paint smoothly and consistently. It makes painting easier because there's no need to go back and rework an area to get perfect coverage. The dense, proprietary fiber construction retains bounce-back for reuse and offers superior finish quality. New Pro/Doo-Z FTP: For Today's Paints.

- No shed and high density For Today's Paints: flat, eggshell, satin, semigloss, gloss, enamels, primers, urethanes, epoxies
- HydroFlow technology provides controlled release to improve paint flow
- Exclusive white fabric with a double golden pinstripe for smoothest finish, greater capacity
- Green[™] double-thick polypropylene core resists water, solvents, and cracking

NOW ALSO AVAILABLE

3-Packs

Ideal choice for entire rooms: one roller for primer, one for the ceiling, a third for walls. Zip-seal bags keep covers clean and protected until it's time for them to go to work.

Jumbo-Koter[®] Minirollers

Made using fabrics identical to their full-size counterparts, these 4½- and 6½-inch minis create finishes that match perfectly every time.

Side Stacks

Stock a large quantity of these industry-changing rollers using a minimum amount of floor space.

WOOSTER®

pro/doo-z FTP™

- For today's paints (flat to gloss) • No shed & high density
- Smoothest finish, improved paint flow

Create the Finest Finishes Faster with Wooster-Exclusive HydroFlow™ Technology

What to Look For in a Miniroller System

The greatest appeal of minirollers is for small jobs that in the past typically required a brush. They are lightweight, fast, and easy to use.

- Minirollers are great for any area with a lot of fixtures, trim, windows, or doorways, resulting in small wall spaces. Keep them in mind for these painting projects:
- Kitchens & baths
 - Cabinets & cupboards
 - Closets & hallways
 - Baseboards & mouldings
 - Doors & railings
 - Cutting-in & trim work

TRADITIONAL MINIS

Roller

Made with common fabrics. Built-in 7/16" bearing assembly allows the cover to spin.

Grip

Plastic handle, threaded for extension pole use.

Shank

Traditionally, a galvanized 1/4" wire designed to support a 6 1/2" miniroller. Chamfered end for more universal cover fit.

Side Nap vs. Button End

Some painters use minirollers to paint corners, where two adjacent walls or the wall and ceiling are the same color. For this, a cover that has fabric wrapped around the end is needed—a side nap or closed end. Other painters want minis that allow them to paint beside a surface of a different color or an unpainted surface. In that case, a button end creates a cleaner line and provides greater control. Both roller styles are useful.

JUMBO-KOTER® SYSTEM

Cage

Precision-engineered to roll smoothly every time, even with heavy materials. Works with both 6 1/2" and 4 1/2" covers.

Roller

Made with the same fabrics as full-size rollers for a uniform finish when trimming or touching up. Open 3/4" core makes cleaning easy.

Shank

Sturdy, chrome-plated 1/4" wire that connects the functioning cage to the grip.

Grip

Full-size polypropylene handle, threaded for extension pole use. Sherlock GT® insert eliminates twisting with those poles.

Painter's Tip from South Carolina

For a better looking paint job, use a brush to cut-in like you normally do, but follow immediately with a Jumbo-Koter and roll as close as possible to eliminate any cut-in differences. Then when the rest of the walls are rolled, you see no cut lines or different textures.
