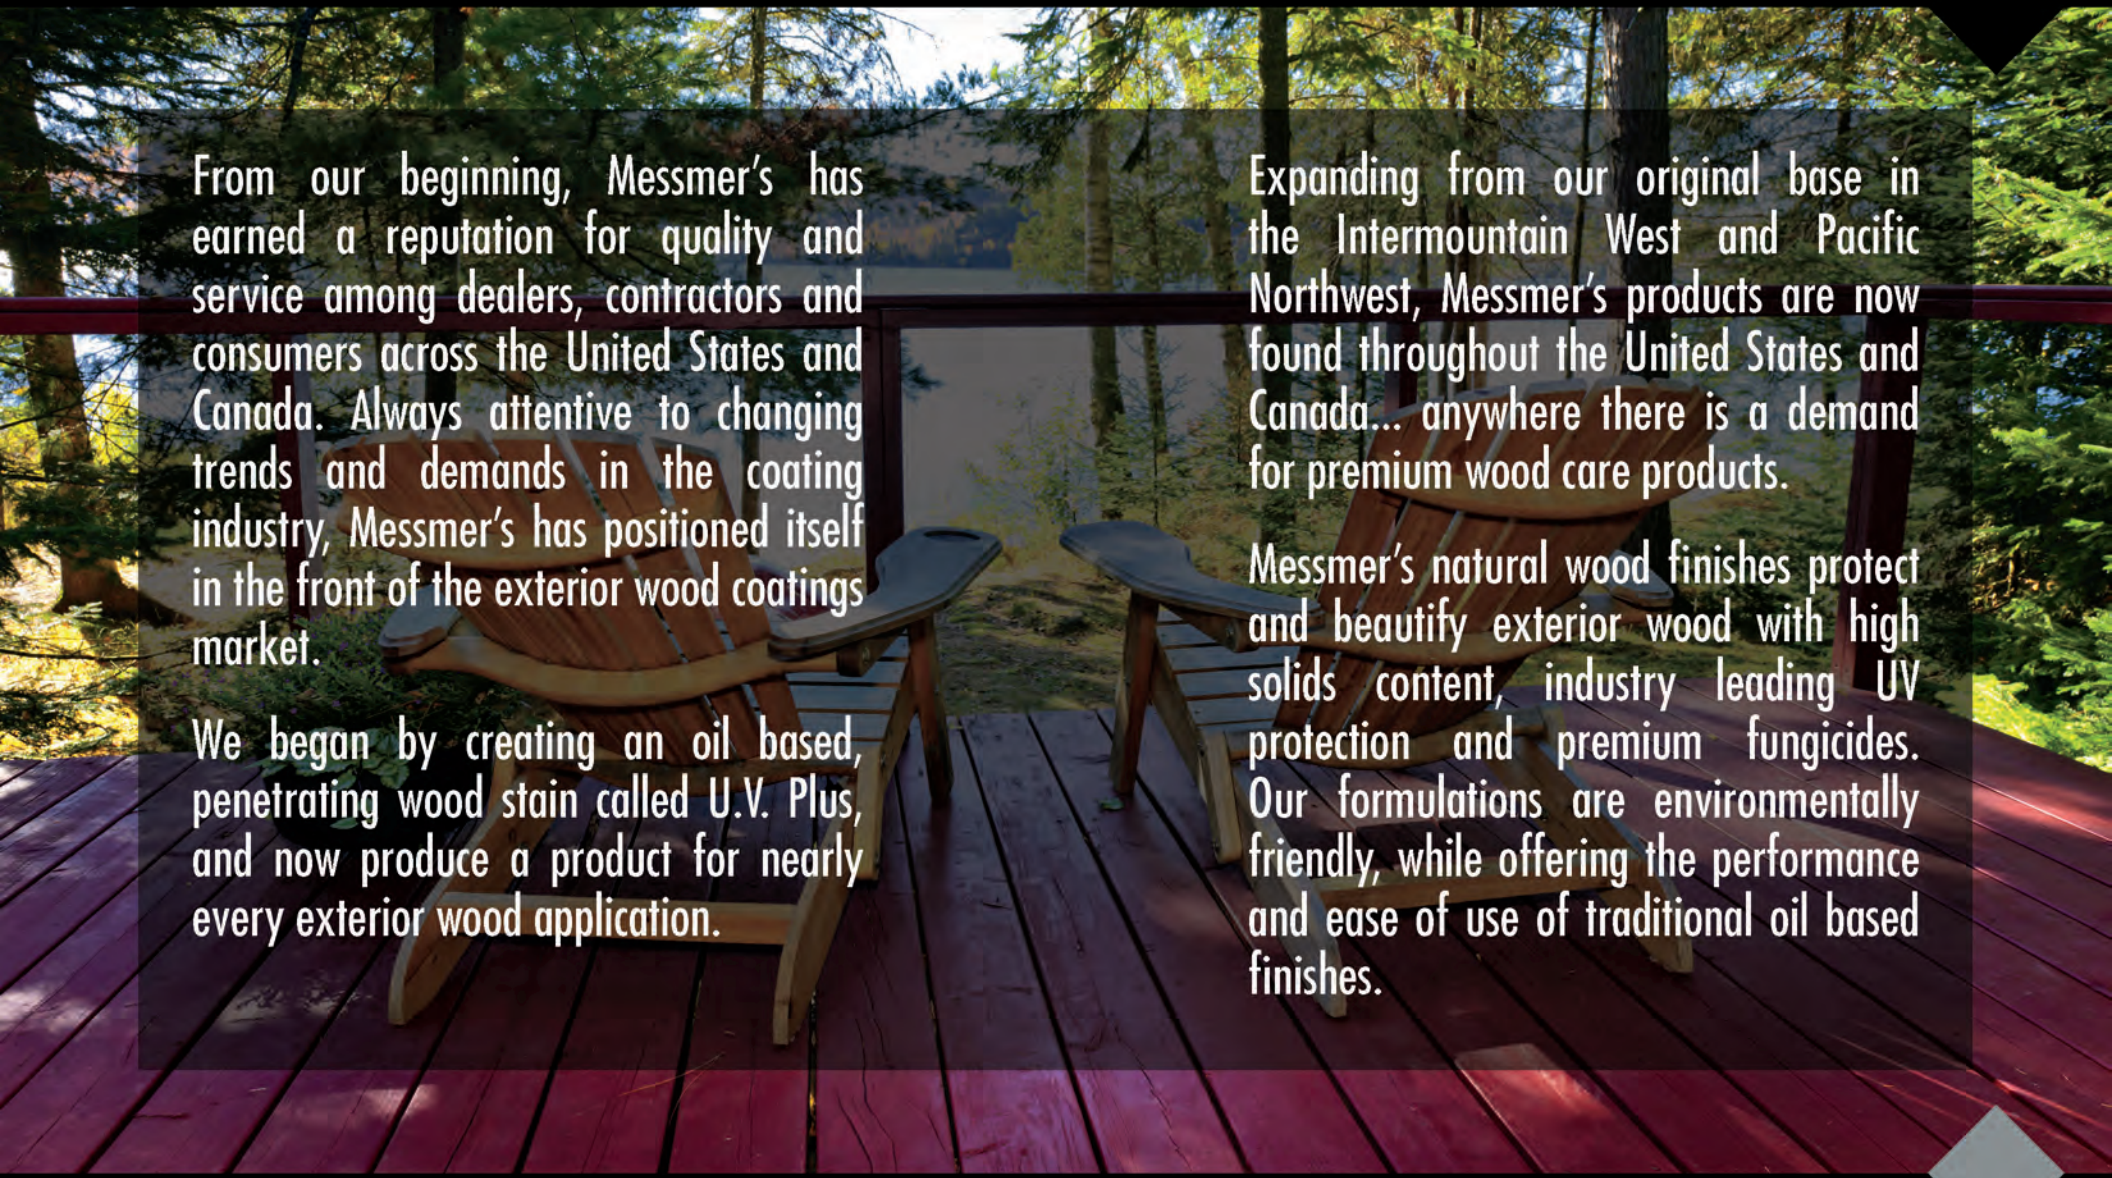
MESSMER'S
NATURAL WOOD FINISHES

PREMIUM STAINS AND COATINGS FOR EXTERIOR WOOD SURFACES

MESSMER'S
NATURAL WOOD FINISHES



From our beginning, Messmer's has earned a reputation for quality and service among dealers, contractors and consumers across the United States and Canada. Always attentive to changing trends and demands in the coating industry, Messmer's has positioned itself in the front of the exterior wood coatings market.

We began by creating an oil based, penetrating wood stain called U.V. Plus, and now produce a product for nearly every exterior wood application.

Expanding from our original base in the Intermountain West and Pacific Northwest, Messmer's products are now found throughout the United States and Canada... anywhere there is a demand for premium wood care products.

Messmer's natural wood finishes protect and beautify exterior wood with high solids content, industry leading UV protection and premium fungicides. Our formulations are environmentally friendly, while offering the performance and ease of use of traditional oil based finishes.
