

Sand Faster, Leave a Better Finish

HYDE® 9-inch Radial Sander plus a complete line of Net Abrasive Sanding Discs and Sheets

HYDE® now offers a **9-inch Radial Sander** with a complete line of net abrasive sanding discs engineered to allow pros to sand large areas with greater ease. This is the lightest radial sander on the market. It has a unique pivoting hinge and round shape that prevents flipping. The Hyde radial sander accepts any 9" round abrasive material that has the hook and loop attachment feature.

HYDE® Net Abrasive Sanding Discs and Sheets are made with an open weave structure that minimizes "loading up" of the material, all but eliminating clogging even when used on painted wall preparation jobs. Unlike sanding screens, the variable net-like structure leaves no sanding pattern or uniform scratch lines that show up after finishing. The pre-cut abrasive sheets are excellent for use with HYDE® dust-free sanders, ensuring the work site meets OSHA and California silicate requirements, and eliminating costly cleanup on repaint jobs. The result is a much cleaner and safer worksite environment.

HYDE® Net Abrasives are available in 120, 150, 180, and 240 grit sizes, and come in standard 3-5/16" by 11-1/4" rectangular sheets for conventional and dust-free hand sanders, and 9" sanding discs for radial and powered orbital sanders.

9-inch Radial Sander

- » Pivoting hinge prevents flipping to prevent damage to walls
- » Hook and loop system for quickly attaching and changing abrasive sheets
- » Attaches to an Acme threaded pole
- » Smoother finish

Net Abrasive Sanding Sheets and Discs

- » No clogging
- » Sands faster, lasts 5X longer than traditional sandpaper and sanding screens
- » Leaves no scratch patterns on surface
- » More durable than sandpaper
- » Use with conventional and dust-free sanders
